SUMMARY

Cybersecurity Architect and Software Engineer with 7+ years of experience, specialized in bringing together cloud architecture, artificial intelligence and security to deliver scalable, reliable systems. Grew from developer to architect, with technical leadership and end-to-end work — development (Java, C#, Python, PHP), cloud (AWS, Azure, GCP), AI (LLMs, RAG, agents) and security (SIEM/SOC and secure development).

EXPERIENCE

Software Engineer

Sep 2025 – Present

Autoconf

- Build conversational agents in Python for the automotive sector, automating previously manual interactions.
- Define architecture and code standards and lead PR review and approval across the team.
- Deliver and maintain features in PHP/Laravel, ensuring performance, scalability and code quality.
- Evolve infrastructure across AWS, Azure and Google Cloud, with containerization (Docker) and CI/CD pipelines.
- Expanded observability with OpenTelemetry, cutting incident diagnosis time by ~30%.
- Collaborate with cross-functional teams to improve reliability and deployment workflows.

SKILLS

Languages

Java C# Python PHP
JavaScript

Cloud & Infra

AWS Google Cloud Azure
Cloudflare Terraform
Docker OpenTelemetry
Sentry Linux

AI

LLMs RAG AI Agents
Machine Learning
BIAS testing

Security

SIEM / SOC
Secure development
Cloud hardening

Web & Data

React Laravel SQL
NoSQL REST APIs CI/CD
Git

CERTIFICATIONS

Microsoft Certified: Azure AI Fundamentals

AI-900

Cybersecurity Architect

Aug 2021 – Apr 2025

CITS — Centro Internacional de Tecnologia de Software

Progression: Mid-level Developer → Senior Developer (Java) → Cybersecurity Architect

- Architected scalable, secure cloud software solutions that supported the growth of multiple production products.
- Implemented and managed SIEM and NOC solutions for continuous monitoring, cutting incident detection time by ~40%.
- Mentored developers on architecture and security, raising the team's technical maturity and autonomy.
- Defined cybersecurity requirements and testing protocols that became a reference for new projects.
- Ran BIAS testing on AI models to ensure fairness and robustness, securing data and models.
- Strengthened infrastructure security posture by reviewing Terraform scripts and Azure configurations.

Junior Developer

Mar 2020 – May 2021

Grunitzky — Audit | Consulting | Training

- Developed web applications and automated tests using PHP and Laravel.
- Built and maintained REST APIs for system integration.
- Modeled and maintained SQL databases.

Full Stack Developer

Sep 2019 – Mar 2020

YouDO Brasil

- Developed web applications with PHP and Laravel and REST APIs for system integration.
- Implemented IoT solutions in Python for room access control via digital identification.
- Created interactive kiosks in C# for purchase automation.

EDUCATION

Postgrad — Software Engineering in Applied AI

UNIPDS · in progress

Postgrad — Networks and Cybersecurity

Hackone · 2023

Postgrad — Software Architecture, Data Science and Cybersecurity

PUC-PR · 2021–2022

Bachelor's — Systems Analysis and Development

Universidade Positivo · 2018–2020
